TRANSFORM AND DRIVE DEMAND

How can Global Innovators Secure Robotic Partnerships with U.S. Leaders?

Digitization, **A**utomation, **C**ollaboration

“

Having a dual presence has greatly benefited us to build the best robots with the best technology behind them for the world to experience.”

Juan Higueros
Co-Founder and COO
at Bear Robotics

Cross-Border Partnerships are the Perfect Match Driving AI Robotics Innovations

Insights from Leaders Who Are Making Waves in Robotics

In BDMT Global's latest industry report, we explore trends in global technology partnerships with leaders from robotics innovators Knightscope and Bear Robotics, who shared how collaborations can enhance operational efficiencies and technological capabilities, as well as contribute to overall economic growth and job creation.
